

A COMPACT PALMTOP COMPUTER SYSTEM AND WIRELESS TELEPHONE
WITH FOLDABLE DUAL-SIDED DISPLAY

ABSTRACT OF THE DISCLOSURE

5 The present invention is a compact personal digital assistant (PDA) and
cellular telephone with foldable dual-sided display. By utilizing flexible display
technology, both a PDA and a cellular telephone are incorporated into one
device. In a closed state, in one embodiment, the present invention
corresponds to the form used for typical cellular telephone use (e.g., candy bar-
10 size). In an open state, in one embodiment, the present invention corresponds
to the form used for typical PDA use by providing an enlarged viewing area.
The present invention provides the benefit of two distinct devices in one device
by allowing for common operations and functionality without compromising the
respective form factor of either device.
